MACHINE ROOM - GEARED TRACTION ELEVATOR

INTRODUCTION

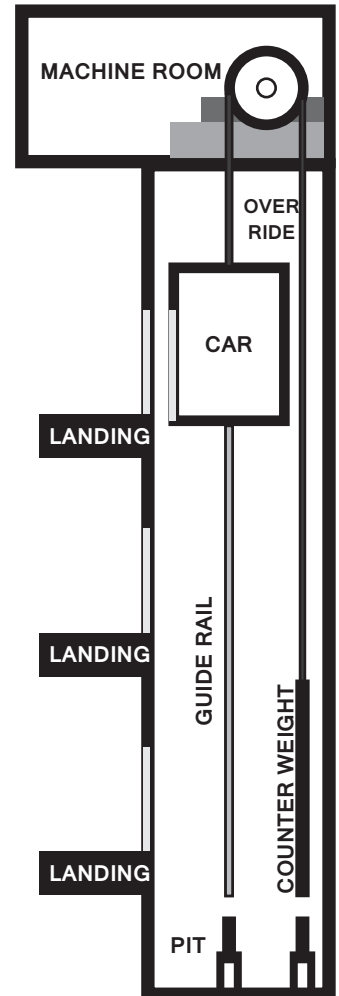

Traction (Geared) Elevators are standard Elevators. The Electric Motor in this design drives a gear type reduction unit, which turns the motor main sheave, and an electrically controlled break between the motor and the reduction unit stops the elevator and holds the Elevator cabin at the desired floor level.

MACHINE ROOM LESS - GEARLESS TRACTION ELEVATOR

INTRODUCTION

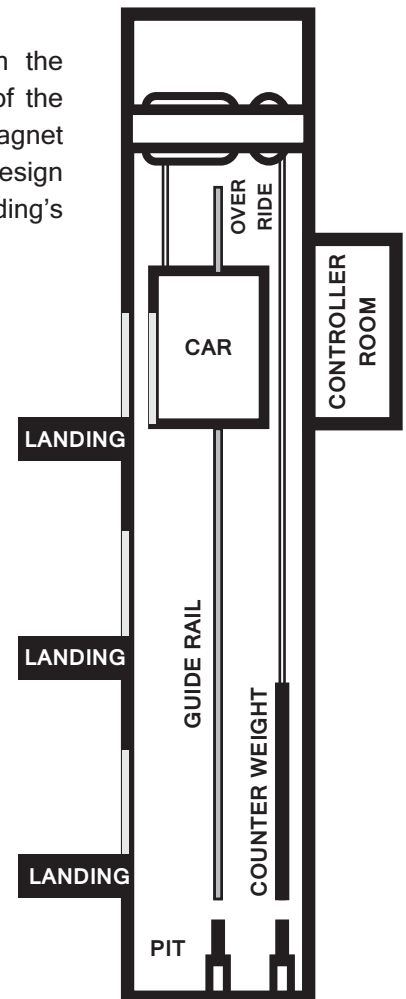

Machine Room Less (Gear Less) Elevator Motors are not fixed in the Machine Room. This type of elevator motors are fixed inside the hoist way of the Elevator Shaft. The Machine Room Motors are installed using permanent magnet which sticks the motor permanently and work with V3F Drive. This MRL design elevator eliminates the need of a machine room and saves much building's space. All the MRL elevators are commonly called Gearless Traction.
